

Subject Index

Acridine

- derivatives, intravital fluorescent staining in cyto-diagnosis of upper gastrointestinal tract, 15
- orange fluorescence, and metachromasy of tumor cells and cell cultures exposed to quinacrine, 57

Adenocarcinoma, uterine, identification of cells with computer assistance, 357

Amido black 10B, as nucleolar stain for lymph nodes in Hodgkin's disease, 218

Analysis

- cluster, in cell recognition, 371
- data, for cervical cancer control, development of a real-time computer system, 278

Aspiration biopsy, effect on aspirated cells, 454

Bacteria, mechanism of attachment to oral epithelial cells, 37

Biopsy, aspiration, effect on aspirated cells, 454

Blood

- peripheral
 - capillary cell clusters of postoperative patients, 439
 - malignancy related changes in smears, 313
- stream, trophoblastic cells in normal and abnormal pregnancy, 137

Book reviews

- Gynäkologische Cytologie*, 410
- Introduction to Quantitative Cytochemistry*, 81

Breast cancer, ring chromosomes in, 159

Bronchial

- origin of giant carcinoma cells, 256
- secretions, atypical ciliated cells in (letter to editors), 177

Cancer

- breast, ring chromosomes in, 159
- capillary cell clusters in peripheral blood of post-operative patients, 439
- cervix
 - changes in DNA content of cells from cytostatic and radiation therapy, 473
 - data analysis in control, 278
- hysterectomy for, diagnostic problems with granulation tissue on vault of vagina after, 25
- lung
 - metastatic, exfoliative cytology of, 61
 - relationship of pulmonary cytology to survival in, 52

See also Carcinoma

Capillary cell clusters, in peripheral blood of post-operative patients, 439

Carcinoma

- cervical
 - effect of diet upon radiation response, 433
 - in situ, squamous, of aged, 462
- Ehrlich ascites, characterization of nuclei by quantitative cytochemistry, 381
- giant cells of bronchiogenic origin, 256
- larynx, cytologic diagnosis by direct smear, 318

See also Cancer

Cell

- identification
 - taxonomic intra-cellular analytic system, 180
- recognition
 - by cluster analysis in pure parameter hyper-spaces, 371
 - from equiprobable extinction range contours, 205
- viability, determination by dye permeability and trypsin digestion tests and by cell cultures with phytohemagglutinin, 454

Cells, See specific type or anatomical location

Cervix uteri

cancer

- changes in DNA content of cells from cytostatic and radiation therapy, 473
- data analysis in control, 278
- effect of diet upon radiation response in, 433
- in situ, squamous, of aged, 462
- changes in epithelium following application of ovulation inhibitors, 294
- didelphic, symmetrical epithelial reactions in, 406
- identification of adenocarcinoma cells with computer assistance, 357
- intraepithelial neoplasia, evaluation of a one-sided cervical cytology method for detection of, 157
- measurement of the pattern of normal and malignant cells of, 9
- mouse, effect of ovariectomy on 20-methylcholanthrene induced dysplasia, 243

smears

- comparison with colposcopic observations, 305
- giant cells in, 298

Chromatin, sex. See Sex chromatin

Chromosome

- late-replicating X, size variation in polycystic ovarian disease, 283
- ring, in a breast cancer, 159

Ciliated cells, atypical, in bronchial secretions (letter to editors), 177

Clusters

- analysis in cell recognition, 371
- capillary cell, in peripheral blood of postoperative patients, 439

Coccidioides immitis, detection in pulmonary cytology, 332

Coelioscopy, sampling of peritoneal fluids, 395

Colpocytogram, compared with urocytogram and lymphocytogram (labia minora smear) in pregnancy, 75

Colposcopy, comparison with suspicious vaginal smears, 305

Computer

- assistance in identification of cells from uterine adenocarcinoma, a clinical feasibility study with TICAS, 357
- real-time system, data analysis in cervical cancer control, 278
- versus cytotechnologists (editorial), 1

Cul-de-sac puncture, to sample peritoneal fluids, 395

- L-cysteine, effects on mouse melanoma and heart cells, 325
- Cytochemistry, quantitative in characterization of nuclei of Ehrlich ascites carcinoma, 381
- Cytodiagnosis, of upper gastrointestinal tract, intravital fluorescent staining with acridine derivatives in, 15
- Cytology
- alterations induced by gastric freezing in dogs, 18
 - body fluids, study by centrifuged coverglass method, 404
 - cervical, evaluation of one-sided method for detection of cervical intraepithelial neoplasia, 157
 - comparative, of squamous carcinoma in situ of cervix in aged, 462
 - diagnosis of carcinoma of larynx by direct smear, 318
 - effects of L-cysteine on pigmented mouse melanoma and heart cells, with reference to nuclear lobulation, 325
 - effusions (letter to editors), 85
 - exfoliative, of metastatic cancer in lung, 61
 - filter preparations (letter to editors), 177
 - gastric
 - lavage, evaluation under direct vision by the fibergastroscope employing Hanks' solution, 345
 - sarcoid, 30
 - hormonal, symposium on, 87-127
 - "numbers game" in reports (letter to editors), 271
 - oral, statement on use, 412
 - peritoneal fluids sampled by coeloscopy or by cul-de-sac puncture, value in gynecology, 395
 - post partum observations over a four-year period, 309
 - prediction of histologic diagnosis, 271
 - pulmonary
 - detection of *Coccidioides immitis* in, 332
 - recovery of material from broken slides, 335
 - relationship to survival in lung cancer, 52
 - sputum, prognostic significance, 430
 - vaginal, as test of placental activity, 140
 - See also* specific type or anatomical location
- Cytophotometric method, photographic, avoiding distributional error, 3
- Diet, effect upon radiation response in cervical carcinoma of uterus, 433
- 9,10-Dimethyl-1,2-benzanthracene, and lung tumors in mice, 237
- DNA
- changes in content in cells from cervical cancer under cytostatic and radiation therapy, 473
 - studies in leukocytes and related cells of mammals, 46
- Dysplasia, of mouse uterine cervix induced by 20-methylcholanthrene, effect of ovariectomy, 243
- Editorial, 1
- Effusions, cytology of (letter to editors), 85
- Endometrium
- cells, in air-dried vaginal smears, 251
 - of normally menstruating women, cytologic effects of progestogens on, 146
- Enzyme, changes in fluorescent alveolar macrophages of lungs of cigarette smokers, 420
- Epithelium
- cervical
 - atypical changes following application of ovulation inhibitors, 294
 - symmetrical reactions of didelphic uteri, 406
 - oral cells
 - mechanism of bacterial attachment to, 37
 - squamous, changes in alkaline solutions, 416
- Error, distributional, a photographic cytophotometric method which avoids, 3
- Exfoliated cells, manifestations of viral infections in, 227
- Exfoliative cytology, of metastatic cancer in lung, 61
- Extinction range contours, equiprobable, and cell recognition, 205
- Fast Green-histone and Feulgen-DNA content of rat leukocytes, 46
- Feulgen-DNA content of rat leukocytes and the Fast Green-histone, 46
- Fibergastroscope, in evaluation of gastric lavage cytology, 345
- Filter preparations, cytology (letter to editors), 177
- Fluids
- abdominal, megakaryocytes in, 78
 - body, cytologic study by centrifuged coverglass method, 404
 - peritoneal, value of cytology to gynecology, 395
- Fluorescence, preservation of acridine orange, and metachromasy of tumor cells and cell cultures exposed to quinacrine, 57
- Freezing, gastric, in dogs, cytologic and histologic alterations induced by, 18
- Gastric
- freezing, in dogs, cytologic and histologic changes induced by, 18
 - lavage, evaluation of cytology by the fibergastroscope, 345
- Gastrointestinal tract, upper, intravital fluorescent staining with acridine derivatives in cytodiagnosis of, 15
- Giant cells
- carcinomic, of bronchiogenic origin, 256
 - in cervico-vaginal smears, 298
- Granulation tissue, on the vault of the vagina after hysterectomy for cancer: diagnostic problems, 25
- Gynecology, value of cytology of peritoneal fluids to, 395
- Heart cells, mouse, cytologic study of effects of L-cysteine in tissue culture with reference to nuclear lobulation, 325
- Histology, alterations induced by gastric freezing in dogs, 18
- Hodgkin's disease, nucleolar stain for lymph nodes in, 218
- Hormonal cytology, symposium on, 87-127
- Hyperspaces, pure parameter, and cell recognition by cluster analysis, 371
- Hysterectomy, for cancer, diagnostic problems of granulation tissue on vault of vagina after, 25

- Identification of cells
 taxonomic intra-cellular analytic system, 180
 from uterine adenocarcinoma, with computer assistance, 357
See also Recognition
- Infections, viral
 manifestations in exfoliated cells, 227
 respiratory tract, cytologic features of, 162
- Intraepithelial neoplasia, cervical, an evaluation of a one-sided cervical cytology method for the detection of, 157
- Labia minora, smear in pregnancy, comparative study of colpocytogram, urocytogram and nymphocytogram, 75
- Larynx, carcinoma of, cytologic diagnosis by direct smear, 318
- Lavage, gastric, evaluation of cytology by the fibergastroscope, 345
- Leukocytes
 and related cells of mammals, studies on DNA in, 46
 rat, Fast Green-histone and the Feulgen-DNA content of, 46
- Liquor amnii, cytologic features of, 42
- Lungs
 cancer
 metastatic, exfoliative cytology, 61
 relationship of pulmonary cytology to survival in, 52
 cytology, detection of *Coccidioides immitis* in, 332
 of cigarette smokers, enzymatic changes in fluorescent alveolar macrophages, 420
 tumors, in mice treated with intravaginal 9,10-dimethyl-1,2-benzanthracene, 237
- Lymph nodes
 staining, in Hodgkin's disease, 218
 tests on aspirates and cell cultures, to determine cell viability, 454
- Macrophages, fluorescent alveolar, enzymatic changes in lungs of cigarette smokers, 420
- Malignancy, progress in interpretation of changes associated with, 445
- Megakaryocytes, in an abdominal fluid, 78
- Melanoma cells, mouse, cytologic study of effects of L-cysteine in tissue culture with reference to nuclear lobulation, 325
- Menstrual cycle, and sex chromatin incidence, 128
 pattern, 131
- Metachromasy, of tumor cells and cell cultures exposed to quinacrine, preservation of acridine orange fluorescence and, 57
- 20-Methylcholanthrene, induction of dysplasia of mouse uterine cervix, 243
- Moles, hydatidiform, sex chromatin in, 290
- Neoplasia, cervical intraepithelial, an evaluation of a one-sided cervical cytology method for the detection of, 157
- Nuclei
 inclusion bodies in vaginal smears (letter to editors), 413
 lobulation, in cytologic study of effects of L-cysteine on pigmented mouse melanoma and heart cells in tissue culture, 325
 of Ehrlich ascites carcinoma, characterization by quantitative cytochemistry, 381
- Nymphocytogram, compared with colpocytogram and urocytogram (labia minora smear) in pregnancy, 75
- Oral
 cytology, statement on use, 412
 epithelial cells
 mechanism of bacterial attachment to, 37
 squamous, changes in alkaline solutions, 416
- Ovariectomy, effect on dysplasia of mouse uterine cervix, 243
- Ovary, polycystic disease, size variation of late-replicating X chromosome in, 283
- Ovulation inhibitors, atypical changes in cervical epithelium following application, 294
- Papanicolaou classification, obsolescence (letter to editors), 414
- Peritoneal fluids, cytology, sampled by coelioscopy or by cul-de-sac puncture, 395
- Phytohemagglutinin, in tests to determine cell viability, 454
- Placental activity, vaginal cytology as a test of, 140
- Post partum cytology, observations over a four-year period, 309
- Pregnancy
 comparative study of colpocytogram, urocytogram and nymphocytogram (labia minora smear) in, 75
 normal and abnormal trophoblastic cells in the blood stream in, 137
- Presidential address, 341
- Progestogens, cytologic effects on the endometrium of normally menstruating women, 146
- Puncture, of cul-de-sac, to sample peritoneal fluids, 395
- Quinacrine, preservation of acridine orange fluorescence and metachromasy of tumor cells and cell cultures exposed to, 57
- Radiation
 effect of diet on response in cervical carcinoma of uterus, 433
 therapy, and changes in DNA content of cervical cancer cells, 473
- Recognition of cells
 by cluster analysis in pure parameter hyperspaces, 371
 from equiprobable extinction range contours, 205
See also Identification
- Respiratory tract, viral infections, cytologic features of, 162
- Sarcoid, gastric, cytology of, 30
- Secretions, bronchial, atypical ciliated cells in (letter to editors), 177
- Sex chromatin
 in hydatidiform moles, 290

- incidence
 - and human menstrual cycle, 128
 - variations in, 352
- pattern, and menstrual cycle, 131
- Smears
 - cervical, comparison with colposcopic observations, 305
 - cervico-vaginal, giant cells in, 298
 - direct, cytologic diagnosis of carcinoma of larynx, 318
 - from tissue submitted for frozen sections (letter to editors), 85
 - labia minora, in pregnancy, comparative study of colpocytogram, urocytogram and lymphocytogram, 75
 - peripheral blood, malignancy related changes in, 313
 - vaginal
 - air-dried, endometrial cells in, 251
 - giant cells in, 298
 - nuclear inclusion bodies in (letter to editors), 413
- See also* specific type or anatomical location
- Sputum cytology, prognostic significance, 430
- Staining
 - intravital fluorescent, with acridine derivatives in cytodiagnosis of upper gastrointestinal tract, 15
 - nucleolar, with amido black 10B, for lymph nodes in Hodgkin's disease, 218
- Symposium on hormonal cytology, 87-127
- Taxonomy, TICAS
 - in cell identification, 180
 - in identification of cells from uterine adenocarcinoma, 357
- Tissue
 - culture, in cytologic study of effects of L-cysteine on mouse melanoma and heart cells, 325
 - granulation, on the vault of the vagina after hysterectomy for cancer: diagnostic problems, 25
 - smears from, submitted for frozen sections (letter to editors), 85
- Trophoblastic cells, in the blood stream in normal and abnormal pregnancy, 137
- Trypsin digestion tests, on aspirates from lymph nodes, spleen and bone marrow to determine cell viability, 454
- Tumor
 - lung, in mice treated with intravaginal 9,10-dimethyl-1,2-benzanthracene, 237
 - preservation of acridine orange fluorescence and metachromasy of cells and cell cultures exposed to quinacrine, 57
 - See also* specific type or anatomical location
- Urocytogram, compared with colpocytogram and lymphocytogram (labia minora smear) in pregnancy, 75
- Uterus. *See* Cervix uteri
- Vagina
 - cytology as a test of placental activity, 140
 - granulation tissue on vault after hysterectomy for cancer, diagnostic problems, 25
 - smears. *See* Smears, vagina
